17. The candidate must fill both the question booklet number and OMR answer sheet number on the attendance sheet.
18. No candidate shall be allowed to leave the centre before **1.00 PM.**

1. An improvement in which of the blood values indicate an effective dialysis?
 - A. Low serum creatinine levels
 - B. Low Hemoglobin
 - C. Hypocalcemia
 - D. Hypokalemia
2. When a nurse is planning an initial home care visit following delivery of a newborn, she recognizes that the visit will be more productive if scheduled when the:
 - A. Mother is feeding the infant
 - B. Husband is out of the home
 - C. Time is convenient for the family
 - D. Nurse has time to spend with the family
3. Under normal physiological conditions, the respiratory center is stimulated by
 - A. Oxygen
 - B. Lactic acid
 - C. Calcium ions
 - D. Carbon dioxide
4. A nurse is caring for a client with rheumatoid arthritis. The primary consideration in caring for this client is
 - A. Surgery
 - B. Education
 - C. Comfort
 - D. Motivation
5. When a client is exposed to an antigen through illness or vaccination, the immune system develops
 - A. Macrophage
 - B. Eosinophil
 - C. Erythrocytes
 - D. Antibodies
6. Nuchal rigidity will not be seen in
 - A. Meningitis
 - B. Intracranial mass with herniation
 - C. Intracranial hematoma
 - D. Cerebral concussion
7. Which of the following is used to assess the level of consciousness
 - A. Apgar score
 - B. Braden scale
 - C. Glasgow coma scale
 - D. Snellen's chart
8. Primary prevention includes
 - A. Early diagnosis and early treatment
 - B. Health promotion and specific protection
 - C. Disability limitation
 - D. All of the above
9. The constant presence of disease within a geographical area is known as
 - A. Epidemic
 - B. Endemic
 - C. Pandemic
 - D. Isolation
10. Chickengunya fever is transmitted by
 - A. Plasmodium
 - B. Aedes aegypti
 - C. Dog bite
 - D. Housefly
11. Cold chain is used for
 - A. Storage of vaccines
 - B. To treat pyrexia
 - C. To maintain room temperature
 - D. All of the above
12. In following which is a welcome sign of pregnancy-
 - A. Engagement
 - B. Lightening
 - C. Internal rotation
 - D. Descent
13. The earliest indicator of Protein energy malnutrition is
 - A. skin changes
 - B. hair changes
 - C. Edema
 - D. Under weight for age
14. Deficiency of which vitamin is not seen in newborn
 - A. E
 - B. D
 - C. C
 - D. K
15. Jaggery is rich in
 - A. Calcium
 - B. Iron
 - C. Vita c
 - D. Vita E
16. A circulating nurse is anticipated to perform which of following role
 - A. Assisting the surgeon
 - B. Count all sponge post operatively
 - C. Performing surgical scrub
 - D. Verifying the consent
17. Which of the following is an intervention for a patient with chronic obstructive pulmonary disease?
 - A. Pursed-lip breathing
 - B. Chronic steroid therapy
 - C. High flow oxygen
 - D. High Carbohydrate diet

18. Low birth weight is defined as birth weight of a baby less than ____ kg
- 1.5
 - 2.0
 - 2.5
 - 3.0
19. The single most effective means for preventing health care associated infection in the hospital?
- Periodic fumigation
 - Prophylactic antibiotic therapy
 - Use of PPE
 - Hand hygiene
20. Which of the following conditions needs to be treated immediately?
- Urinary retention
 - Closed fracture
 - Eye injury
 - Continuous bleeding
21. The nurse is caring for a client who is thought to have pernicious anemia. What signs and symptoms would the nurse expect in this person?
- Easy bruising
 - Beefy-red tongue
 - Fine red rash on the extremities
 - Pruritus
22. Isolation of a child with measles belongs to what level of prevention?
- Primary
 - Secondary
 - Intermediate
 - Tertiary
23. Which immunization produces a permanent scar?
- DPT
 - BCG
 - Measles vaccination
 - Hepatitis B vaccination
24. Immediate first aid treatment for dog bite is
- Apply antiseptic lotion
 - Wash with soap and water for 15 minutes
 - Suture the big wound
 - Cover with dressing
25. National Non Communicable Disease Prevention & Control Program includes
- Cancer, Diabetes, Cardiovascular & strokes
 - Cancer, Diabetes, Leprosy & Tuberculosis
 - Cancer, Leprosy, Diabetes & tuberculosis
 - Cancer, Hypertension, Cardiovascular & diabetes
26. When India was declared Polio free?
- 27th March 2014
 - Not yet declared
 - 27th March 2019
 - 27th March 2020
27. Which one is a natural method of family planning
- BBT
 - Tracing changes in cervical mucous
 - BBT and Tracing changes in cervical mucous
 - None of these
28. Which of the following is NOT a therapeutic communication technique?
- Restating
 - Giving advice or approval or disapproval
 - Providing acknowledgement and feedback
 - Listening
29. Which of the following complication associated with tracheostomy tube:
- Increased cardiac output
 - Acute respiratory distress syndrome(ARDS)
 - In creased blood pressure
 - Damage to the laryngeal nerve
30. The top most need according to Maslow's Theory of Need Hierarchy is:
- Self-esteem
 - Physiological needs
 - Love & belongingness
 - Self-actualization
31. Russian psychologist Ivan Pavlov proposed which of the following:
- Law of Exercise
 - Law of Readiness
 - Classical conditioning
 - Instrumental conditioning

32. Behaviour of an individual includes which of the following aspects:
- Cognitive
 - Conative
 - Affective
 - All of the above
33. After completion of basic nursing education, a nurse needs to register with the following to practice as RNRN.
- Indian Nursing Council
 - State Nursing Council
 - Trained Nurses Association of India
 - Nursing Research Society
34. Full form of ECT is:
- Electro conclusive therapy
 - Elementary conclusive therapy
 - Electro convulsive therapy
 - Elementary convulsive therapy
35. Trained Nurses Association of India (TNAI) was formed in
- 1888
 - 1908
 - 1920
 - 1947
36. Illness has a great impact on:
- Behavior & emotions
 - Self concept
 - Family dynamics
 - All of the above
37. Which of the following is three dimensional aid?
- Model
 - Chart
 - Bulletin board
 - Green board
38. 1800 ml is equal to how many liters?
- 1.8
 - 18000
 - 180
 - 2800
39. The assigning of various roles to be performed by nurses working in the ward is called
- Controlling
 - Staffing
 - Organising
 - Planning
40. Cause of juvenile delinquency include
- Defective heredity
 - Defective environment
 - Broken family
 - All of the above
41. Calcium deficiency in the body occurs in the absence of
- Vitamin B
 - Vitamin E
 - Vitamin C
 - Vitamin D
42. Full form of NNMC is
- New Nursing and Midwifery council
 - National Nurses and midwifery Commission
 - National Nursing and Midwifery council
 - National Nursing and Midwifery Commission
43. Goitre occurs because of deficiency of which substance in diet?
- Sodium
 - Magnesium
 - Calcium
 - Iodine
44. 20 cc is equal to how many ml?
- 2
 - 20
 - 2000
 - 20000
45. The ideal Nurse-Client ratio in intensive care unit is
- 1 : 1 per shift
 - 1 : 2 patient per shift
 - 1 : 3 Patients per 8 hours
 - 1 : 2-4 patients
46. O positive blood group not available in blood bank, which blood group may be given to patient
- O Negative
 - AB positive
 - A positive
 - B Positive
47. South East Asia's WHO regional office is located at
- Delhi
 - Mumbai
 - Hyderabad
 - Kolkata

48. Which is the patient's clinical record?
- Intake and output chart
 - Duty chart of staff nurse
 - Stock register
 - Staff performance record
49. The nurse suspects an elderly client has become impacted when the client says:
- I have a lot of gas pains
 - I don't have much of an appetite
 - I felt like I have to go and just can't
 - I haven't had a bowel movements for 2 days
50. A client has peptic ulcer in the duodenum. He would probably describe the associated pain as;
- An ache radiating to the left side
 - An intermittent colicky flank pain
 - A gnawing sensation relieved by food
 - A generalized abdominal pain intensified by moving
51. The normal heart rate of the infant, within 3 minutes after birth may range between
- 100 and 180
 - 130 and 170
 - 120 and 160
 - 100 and 130
52. A client who has missed two menstrual periods is complaining of vaginal bleeding and one sided lower- quadrant pain. The nurse suspects that this client has
- Abruption placenta
 - An ectopic pregnancy
 - An incomplete abortion
 - A rupture of graafian follicle
53. After a spontaneous abortion, the nurse should observe th client for
- Signs of pregnancy-induced hypertension
 - Hemorrhage and infection
 - Subinvolution and dehydration
 - Dehydration and hemorrhage
54. A new mother is concerned because her baby has jaundice. The nurse understands that jaundice is a (an);
- Normal condition that appears at 2 to 3 days of life
 - Normal condition that appears 8 to 24 hours of birth
 - Abnormal condition that appears within the first 24 hours of life
 - Abnormal condition that appears at 2 to 3 days of life
55. True labor differs from false labor because, in true labor contractions will
- Bring about progressive cervical dilatation
 - Occur immediately after membrane rupture
 - Stop when client is encouraged to walk around
 - Be less uncomfortable if client is in a side lying position
56. A specific clinical symptom of infection in a postpartum client is
- Dark red lochia
 - Generalized rash all over the body
 - Discomfort and tenderness of the abdomen
 - Bradycardia
57. A client who has received an initial dose of an antibiotic has severe wheezing within minutes. The most appropriate documentation to describe the situation is
- Idiosyncratic reaction
 - Anaphylactic reaction
 - Serum sickness
 - Cumulative effect
58. In a client with essential hypertension, the initial treatment is
- A diuretic agent
 - Low-sodium diet, weight reduction and an exercise program
 - A diuretic agent, low fat diet and exercise
 - Adrenergic blocking agent and weight reduction
59. A possible adverse reaction to phenytoin (Dilantin) that should be reported to the physician is
- Cavities
 - Hypertension
 - Bleeding of gums
 - Agitation, confusion
60. Pallor, coolness of the skin and edema at the site of administration are the manifestations of an IV complications
- Tissue necrosis
 - Thrombophlebitis
 - Infiltration
 - Infection

61. A episode of expectoration of blood is described as
- Hematuria
 - Hematoma
 - Hemoptysis
 - Hematemesis
62. Selection of drugs of choice for the treatment of pneumonia, primarily depends on
- Tolerance of the client
 - Selectivity of the organism
 - Sensitivity of the organism
 - Preference of the physician
63. The earliest clinical sign in a young infant with idiopathic respiratory distress syndrome is usually
- Grunting
 - Synopsis
 - Rapid respiration
 - Sternal and subcostal retraction
64. The position in which a client with dyspnea should be placed is
- Sims
 - Supine
 - Orthopneic
 - Trendelenburg
65. An environmental factor that increases the risk of cancer is
- Gender
 - Age
 - Immunologic status
 - Nutrition
66. Drugs instilled in the eye are administered by the method known as
- Topical
 - Injection
 - Intraocular
 - Insufflations
67. The nurse is counseling a client about preventive measures of cancer. One of the most important behaviors to emphasize is to
- Decrease fat intake
 - Avoid exposure to the sun
 - Avoid smoking
 - Obtain adequate rest
68. If glaucoma is left untreated, it leads to
- Blindness
 - Myopia
 - Retrolental fibroplasias
 - Uveitis
69. When helping a very confused elderly client, the best approach is to provide an environment with
- A specific routine
 - Group involvement
 - A trusting relationship
 - Activities that are varied
70. The most common characteristic of children who are emotionally disturbed is that they
- Respond to any stimulus
 - Respond to little external stimulus
 - Seem unresponsive to the environment
 - Are totally involved with the environment
71. Communication ties the people to their
- Social surroundings
 - Physical surroundings
 - Materialistic surroundings
 - Environmental surroundings
72. The nurse has knowledge that gonorrhea is highly infectious and
- Is easily cured
 - Occurs very rarely
 - Can produce sterility
 - Is limited to the external genitalia
73. During blood transfusion, the nurse determines that a hemolysis reaction is occurring in the client. The first nursing intervention is to
- Slow down the transfusion
 - Administer IV Benadryl
 - Stop the transfusion
 - Notify the physician
74. During insertion of retention catheter or irrigation of the bladder, the nurse must use
- Sterile gloves and sterile equipments
 - Clean equipments and maintain surgical asepsis
 - Sterile equipment and maintain medical asepsis
 - Clean equipment and technique
75. When a client has hematuria, the nurse should observe for
- Diarrhea
 - Acetone in urine
 - Symptoms of peritonitis
 - Gross blood in the urine

76. A skin graft that is taken from another portion of a client's own body is known as
- An allograft
 - A xenograft
 - An autograft
 - A homograft
77. Clients with osteoporosis are vulnerable to
- Fatigue fractures
 - Pathologic fractures
 - Greenstick fractures
 - Compound fractures
78. When evaluating fluid loss from burns, the best blood test is
- BUN
 - Blood pH
 - Hematocrit
 - Sedimentation rate
79. A client has a temperature 99.8°F. This temperature is equal to
- 36.5°C
 - 37.0°C
 - 37.7°C
 - 38.2°C
80. Cold applications for short periods of time produce
- Local anesthesia
 - Peripheral vasodilation
 - Depression of vital signs
 - Decreased viscosity of blood
81. Bedrest has been prescribed for a client. The nurse can best prevent foot drop in this client by the use of
- Splints
 - Blocks
 - Cradles
 - Sandbags
82. The clients with dysphagia may experience difficulty in
- Writing
 - Swallowing
 - Focusing
 - Understanding
83. Which of the following can benefit from a therapeutic diet?
- Someone with disease
 - Someone who is obese
 - Someone who has cardiovascular disease
 - All of the above
84. Fiber is important to facilitate which function in body?
- Provide energy
 - Absorb nutrients
 - Bozel movements
 - Maintain electrolyte balance
85. A nurse must be aware that eating maize alone may lead to
- Beri-beri
 - Pellagra
 - Scurvy
 - Phrynoderma
86. Choose from the list below that includes different methods of cooking food
- Boiling, Kneading, Roasting
 - Baking, Boiling, Rolling
 - Frying, Soaking, Roasting
 - Baking, Frying, Roasting
87. A function of carbohydrates in the diet is to-
- Enable chemical reactions
 - Promote growth and repair of tissues
 - Supply energy
 - Maintain water balance
88. _____ is an example of live attenuated bacterial vaccine.
- Cholera
 - Typhoid
 - Anthrax
 - Plague
89. The most common method of storage of vaccine in PHC level is
- Refrigerator
 - Ice lined refrigerator (ILR)
 - Cold chain
 - Vaccine carriers
90. Person who carry disease producing organism without producing any symptoms is called
- Host
 - Carrier
 - Agent
 - None of the above
91. The placenta is disposed of in a _____ color bag.
- Red
 - Blue
 - Yellow
 - Black

92. When preparing to administer the vitamin K injection to a neonate, the nurse would select which of the following sites as appropriate for the injection?
- Deltoid muscle
 - Vastus lateralis muscle
 - Gluteus maximus muscle
 - Anterior femoris muscle
93. A nurse obtained a client's pulse and found the rate to be above normal. The nurse document this findings as:
- Tachypnea
 - Hyper pyrexia
 - Arrythmia
 - Tachycardia
94. Which of the following is the medical term for heart muscle disease?
- Cardiopathy
 - Cardiomegaly
 - Cardiomyopathy
 - Cardioplegia
95. The copper used in Copper T has the following action
- Spermicidal
 - Bacteriostatic
 - Blastocidal
 - Bacteriocidal
96. The therapeutic effect of Magnesium Sulphate for the client with preeclampsia would be demonstrated by
- Increased Blood Pressure
 - Increased Urinary Output
 - Decreased Respiratory rate
 - Decresed Uterine irritability
97. The client tells the nurse that her last menstrual period started on January 14 and ended on January 20. Using Nagele's rule, the nurse determines her EDD to be which of the following?
- 27 September
 - 21 October
 - 7 November
 - 27 December
98. Psychosexual development theory is given by
- ErikErikson
 - Sigmund frued
 - Piaget
 - Kohlberg
99. Drug that cause expulsion of gas from intestinal tract
- Astringent
 - Catharatics
 - Carminatives
 - Emetics
100. GOBI campaign is being promoted by
- WHO
 - UNICEF
 - CARE
 - UNDP
